Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

### IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

#### **REMARKS**

Currently pending in this application are claims 39-64, 66-74 and 76-81. Claims 1-24 were canceled in a prior amendment and claims 65, 75 and 92 have been canceled in this amendment.

Claim 46 has been amended to refer to a solvent instead of a diluent and to depend from claim 39.

Claim 48 has been amended to delete reference to castor oil.

Claim 52 has been amended to refer to a solvent instead of a diluent and to depend from claim 48.

Claim 63 has been amended to refer to a solvent instead of a diluent and to depend from claim 57.

Claim 66 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 73 has been amended to refer to a solvent instead of a diluent and to depend from claim 66.

Claim 76 has been amended to change addition to additive, correcting an obvious typographical error and to delete reference to castor oil.

Claim 80 has been amended to refer to a solvent instead of a diluent and to depend from claim 76.

Claim 84 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 90 has been amended to refer to a solvent instead of a diluent. .

The examiner has rejected claims 46, 52, 63, 73, 80 and 90 under 35 U.S.C. §112, first paragraph as failing to comply with the written description requirement. Specifically the

Application No.: 10/084,831 Docket No.: P02917US5 (AKA ORYXE.030A)

examiner noted that the specification did not support defining certain compounds recited in the claims as "diluents when the specification defined them as solvents. The claims have been amended to define the compounds as solvents and to change their dependency to the preceding independent claim.

The examiner next rejected claims 42, 59, 60, 65, 66, 69, 70, 75, 76, 84, 86, 87, and 92 under 35 U.S.C. §112 as indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention.

The examiner rejected claims 48, 59, 69 and 86 on the grounds that the examiner did not see the distinction between the plant oil extracts derived from grain and the vegetable and nut plant oils. The examiner stated the opinion that vegetables and nuts are also grains. Applicants respectfully traverse this rejection. As defined by Webster's, a grain is a seed of fruit from a cereal or grass. Merriam-Webster's Collegiate Dictionary, p. 543 (11<sup>th</sup> Edition, 2003) (attached). A vegetable on the other hand is a herbaceous plant and a nut is a hard shell dry fruit or seed. Id at 853, 1386. While all of these are plants, they are different varieties and the differences in the oil extracts and oils would be apparent to one skilled in the art. In addition, plant oil extracts are generally obtained from chlorophyll containing parts of the plant (see, e.g. paragraphs 59 and 60), whereas vegetable oils are generally extracted from the seed, nut or fruit (see, e.g., paragraphs 75 and 76). Thus, applicant respectfully submits that the two groups of materials are distinct the claims are not indefinite.

The examiner rejected claims 60 and 65 as substantial duplicates. Claim 65 has been canceled rendering the rejection moot.

The examiner rejected claims 66, 76, and 84 noting that the term "addition" should read "additive." The claims have been amended to change the term "addition" to "additive".

The examiner rejected claims 87 and 92 as substantial duplicates. Claim 92 has been canceled rendering the rejection moot.

The examiner rejected claims 73 and 78 as substantial duplicates. Applicant respectfully points out that claim 73 and 78 of this application are not substantial duplicates.

25426721.1

Applicant believes that the examiner is referring to claims 70 and 75. Claim 75 has been canceled rendering he rejection moot.

The examiner has rejected claims 48, 51-54, 76 and 79-82 under 35 U.S.C. §102(b) as anticipated by U.S. Patent 5,862,369 to Jordan. The examiner noted that Jordan teaches a fuel composition that contains beta-carotene (carotenoid), chlorophyll (hydrophobic plant extract) and ethoxylated castor oil (thermal stabilizer) as well as cetane improvers. The composition may be diluted with various solvents including gasoline, toluene, diesel fuel and alcohols. Applicants respectfully submit that the claims as amended are not anticipated by Jordan.

As noted above, the Markush group in claims 48 and 76 that define the thermal stabilizer does not include castor oil. None of the other oils recited in the claims are taught or recited in Jordan. Thus Jordan can not anticipate the claims. Claims 51-54 depend from claim 48 and claims 79-82 depend from claim 76. Since Jordan does not anticipate the independent claims it can not anticipate the dependent claims.

#### **CONCLUSIONS**

Applicant submits that the pending claims are free of the art and are in condition for allowance.

Applicant believes there is no fee due with this response. However, if fees are due, please charge our Deposit Account No. 06-2375, under Order No. P02917US5 (AKA ORYXENG.030A) from which the undersigned is authorized to draw.
